

Automatic Milk Feeding

Udderly different

We chose the Uddermatic system for 2 main reasons:

- to be able to feed in individual pens
- for the nipple wash between each calf

*-Donald Lapointe Farm,
Lambton, QC*

*Labour savings with the Uddermatic rail feeders
has been #1 benefit for us.*

*We have also had fantastic success during the
weaning transition.*

*- Wilma Farms,
Walton, ON*

The *Uddermatic milk feeding systems* introduce a revolutionary approach to feeding calves, kids and lambs. Frequent feedings ensure maximum performance. See [videos](#) on our [website](#), or contact a dealer for inquiries. www.uddermatic.ca
